

**Declare your Audio Independence... break free from multi-driver conformity.  
Introducing the New Future Sonics mg5pro™ Ear Monitors®**

**Bristol, PA – December 15, 2011** - Future Sonics, the leader in custom dynamic monitors and innovator of the Award winning Ear Monitors® brand is excited to announce their next new Ear Monitors® model. The mg5pro<sup>i</sup> Ear Monitors® marks another advancement in Future Sonics Dynamic Revolution by creating the world's first custom personal monitors to feature Future Sonics' proprietary 10mm Dynamic Transducers. The mg5pro<sup>i</sup> is competitively priced to reach many of the musicians and music lovers who want a custom earpiece with Future Sonics Audio Signature but where budgets would not allow for the higher priced flagship sibling, the mg6pro<sup>i</sup>.

Future Sonics has created a custom monitor that delivers an Audio Signature with energy that no Balanced Armature earpiece can match; no matter the number of drivers inside. The mg5pro<sup>i</sup>, like all Future Sonics products, delivers a deeper, more accurate bass response, clean transparent highs and natural, warm vocal tones. Future Sonics is the only brand on the market today to design and manufacture its own line of proprietary transducers for their professional earphones. The mg5pro<sup>i</sup> elevates their already legendary miniature dynamic technologies by creating a 10mm speaker capable of 20Hz - 20,000Hz TrueTimbre<sup>i</sup> Response, Sensitivity 110dB at 30Hz and 26 dB +/- Ambient Noise Rejection.

"We are known for a studio reference sound; which in a positive way keeps us from creating an extensive product line with varying audio qualities just to meet price points," states Marty Garcia, Founder & CEO. "The idea behind our new mg5pro<sup>i</sup> was to bridge the gap between our Atrio® universal professional earphones and our flagship mg6pro<sup>i</sup> Ear Monitors®. In doing so it gives us the ability to offer a competitively priced model for those professionals, musicians and audiophiles who want our Audio Signature within that price range."

The mg5Pro<sup>i</sup> 10mm speakers deliver a realistic and dynamic sound even at the lowest volumes and produce an audio quality that performs with greater reliability for the most demanding performance applications in concert touring, broadcast, houses of worship, recording, mixing and multimedia situations. Visit Future Sonics at The NAMM Show January 19-22, 2012, Hall A, Booth# 6626, where you can demo both the new mg5pro<sup>i</sup> and their flagship mg6pro<sup>i</sup>. Go ahead, Join the Dynamic Revolution!
